-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3-9,13,14,17 are rejected under 35 U.S.C. 102(b) as being anticipated by Bailey (6156450).

Col. 1 of Bailey teaches what is old and well known in the art. Specifically, line 16 teaches the use of a thermochromic ink that is printed over a resistor. Also, the power the resistor can deliver is shown by a color change of the ink.

Applicant's claim 1 does not require a defibrillator, but only a resistor that has a layer of temperature reactive material thereon. It is considered implicit that the

tester
test of Bailey, col. 1, includes two contacts, so that testing can be performed.

Similarly, applicant's claim 17 does not require the use of a defibrillator, but only the ability to receive a signal, which the circuit of Bailey is deemed to be able to do.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2,10-12,15,16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bailey.

Re claim 2, one of ordinary skill in the art would know that the tester described in col. 1 of Bailey could be used with any size resistor. Further, the ordinary artisan would be expected to appreciate that the resistor can be in various shapes, depending on the desired purpose. Also, to use a substrate is considered old and well known in the resistor art.

Allowable Subject Matter

5. Claim 18 is allowed.
